Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by Benson. Benson, directed toward a leachfield, teaches delivering heat to an influence zone to heat the soil (col. 3, lines 60-62., col. 4, line 22).

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Benson in view of Potts.

Benson, is described above. Benson also discloses flowing heated air. Benson does not disclose stopping the flow of wastewater, prior to heating and flowing, then resuming flow of wastewater.

Potts discloses stopping the flow of wastewater during a renovation step and then resuming the flow of wastewater in order to better treat wastewater that enters the system after aeration (col. 10, lines 42-45).

It would have been obvious for the skilled artisan to have modified the method of Benson such that it includes stopping the flow of wastewater during a renovation step

Art Unit: 1724

and then resuming the flow of wastewater in order to better treat wastewater that enters the system after aeration, as suggested by Potts.

Response to Arguments

5. Applicant's arguments with respect to amended claims 1 and 19 as amended have been fully considered and are persuasive. The rejection of claims 1-16 and 19-31 has been withdrawn.

6. Applicant's arguments filed December 22, 2003 have been fully considered but they are not persuasive in view of Benson and Potts.

Applicant argues that Benson merely mentions a leach field without indicating what a leach field comprises, how heated air ought to be used, and does not provide a meaningful disclosure. However it is noted that the patent to Benson is directed toward the skilled artisan who would necessarily, upon reading the words "leach field", know what a leach field is, as leach fields have been utilized for decades. Further, Benson makes clear hot air is provided through conduits embedded in soil to "treat" the soil (col. 3, lines 60-62) and shows via Figures 1 and 2 how the conduits would be placed in the soil. Clearly, the skilled artisan would know to provide relatively warmer air through conduits embedded in the soil of a leach field, as inherently taught by Benson.

Allowable Subject Matter

7. Claims 1-16 and 19-31 are allowed.

Art Unit: 1724

8. The following is a statement of reasons for the indication of allowable subject matter: The claims are allowed for the reasons provided by applicant in the remarks filed December 22, 2003.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
